TIMELESS CHARACTER. MODERN LIVING.

FOAKE®

Antique Oak Effect Beams

By UK Home Interiors

The beauty of heritage, *made for today.*

Oak beams and traditional timbers have the power to transform a home.

Now that classic character can be achieved in a fraction of the time and at a fraction of the cost of solid oak—without losing the beauty or intricate detail of hand-worked timber.

Our range is crafted from modern materials using moulds taken from carefully selected original oak beams.

Every detail is beautifully preserved, as we use latex moulds and then finished by hand.

The result is a collection that looks and feels remarkably authentic.

Unlike solid oak, our beams are lightweight and easy to cut, making installation simple and hassle-free.

Timeless Character, Modern Living.

BEAMS

Hand-crafted beams with the soul of heritage and the precision of modern design.

Crafted from original antique oak timbers, each beam captures centuries of character without the weight, movement or limitations of solid timber. Lightweight, durable and meticulously hand-finished, these beams are designed for effortless installation and timeless impact.

- Lightweight & easy to install
- Durable & shock resistant
- Moulded from original oak timbers
- Unlike wood, will not "move" after installation
- Hand stained for a natural look.

Need Help with Design?

On the following pages you will find guidelines on how to design your ceiling layout. If you need help though, just give us a call or drop us an email with your ceiling dimensions and give us an idea as to the effect you are trying to achieve.

For more information on colours, please see page 22.

For more information on the accessories, please look at page 18.

Main Beam 1

A beautifully 'gnarled' beam, available in 2 lengths.

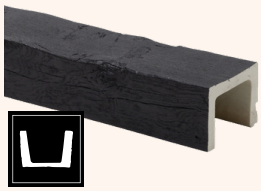

Lengths:
3660mm / 1800mm

Width:
170mm

Internal Width:
115mm (min)

Depth:
260mm (max) / 190mm (min)

Internal Depth:
120mm (min)

Main Beam 2

Our most popular and symmetrical beam.

Length:
3000mm

Width:
175mm

Internal Width:
130mm

Depth:
128mm

Internal Depth:
110mm

Main Beam 3

A smaller version of the Main Beam 2.

Length:
2440mm

Width:
125mm

Internal Width:
70mm

Depth:
100mm

Internal Depth:
65mm

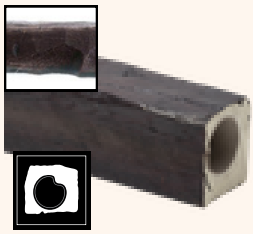

10ft Joist

Supplied as 3 different models to avoid repetition.

Length:
3048mm

Width:
75mm

Depth:
50mm

Intermediate Beam Old Style

A weathered beam, moulded on all 4 sides so able to be used as a post. Can also be used as a ceiling beam, but may need a channel cut from one of the sides to create a "U" shape.

Length:
3720mm

Width:
150mm

Depth:
150mm

Intermediate Beam New Style

A more symmetrical and less weathered beam. This is also moulded on all 4 sides so can either be used as a post or a ceiling beam as per the Old Style beam.

Length:
3720mm

Width:
150mm

Depth:
130mm

Easy to join multiple lengths together by simply butt joining and covering the join with either the B2 or B3 Simulated Iron Bracket or the Flexible Iron Strap. See page 18 for more information on the joining options.

For samples, please visit www.ukhomeinteriors.co.uk. Please note sizes and colours may vary slightly from those shown.

DESIGNING A BEAMED CEILING

The primary design objective is to look realistic. To achieve this realism, we suggest your ceiling is made up from 1, 2 or 3 sizes of beam:

1. **Main Beams**
2. **Intermediate Beams**
3. **Joists**

We suggest you start with the largest size and work down. The simplest design is to use only a main beam. This is realistic as sometimes smaller beams and joists were covered by plasterwork. This is more desirable than running a scheme with too few additional beams and joists which will look unrealistic.

Most people, however, build a network of intermediate beams and/or joists running from their main beam by following a few simple rules.

Main Beams:

- Should cross the room at its narrower dimension. Can be centrally positioned, or be offset.
- Smaller intermediate beams and/or joists are built up from the main beam.
- Rooms up to 16ft (4.87m) long require only one main beam. If your room measures much over 16ft (4.87m) you will need to incorporate either intermediate beam(s) or more main beam(s). This is because traditionally joists were between 5ft (1.52m) and 6ft 6" (1.98m) long. They were never longer than 8ft (2.44m) as over this length they would be too small to carry the weight of the floor running over it.

Intermediate Beams:

- Are used when the area between your main beam or beams and wall is greater than 8ft (2.44m)
- Run off your main beam at a 90 degree angle.
- Can run from one or both sides of the main beam.
- If running from both sides they can run from the same point, or be offset from each other.
- Can also be used as the principal beam in a small or low room.

Joists

- Run off your main and/or intermediate beams at 90 degree angles.
- Should be generally between 5ft (1.52m) and 6ft 6" (1.98m) long and should not be longer than 8ft (2.44m)
- Would traditionally be fitted around 16" (40cm) apart (centre to centre) although up to 24" (61cm) looks realistic. (if you wish to place joists further apart, we recommend you use one of the half depth intermediate beams spaced at 39" (1m) to 47" (1.2m) centres.)

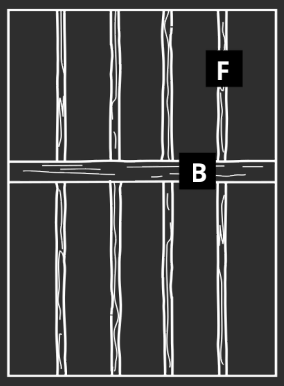

A Few Layout Options:

FOAKE™

Here are a few common layout options. Whilst these are all symmetrical you can add asymmetry easily, but don't forget that the "gnarled" finish of the product adds asymmetry in itself.

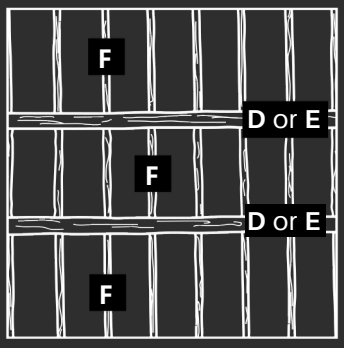

A Main Beam 1
B Main Beam 2
C Main Beam 3
D Intermediate Beam (Old)
E Intermediate Beam (New)
F 10ft Joists

13ft x 8ft room

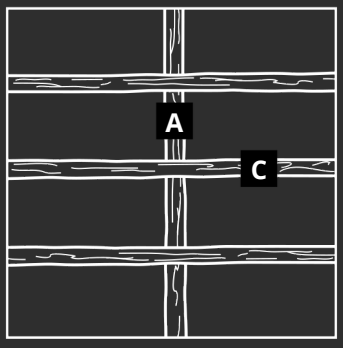

B x 1
F x 8
Touch up kit

12ft x 12ft room

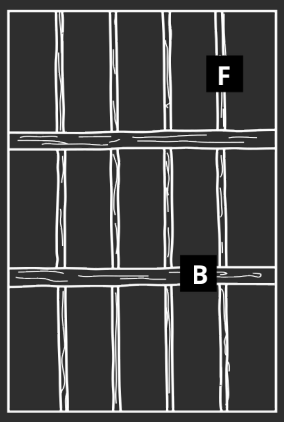

D or **E** x 2
F x 8 (cut into thirds)
Touch up kit

12ft x 12ft room

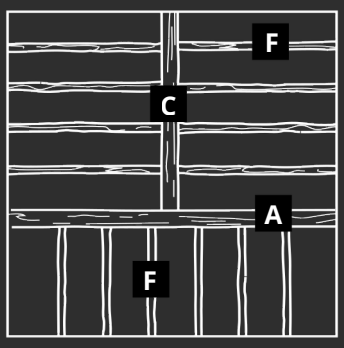

A (12ft length) x 1
C x 6
Touch up kit

13ft x 8ft room

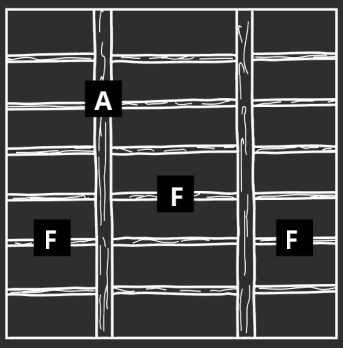

B x 2
F x 6 (cut in half)
Touch up kit

12ft x 12ft room

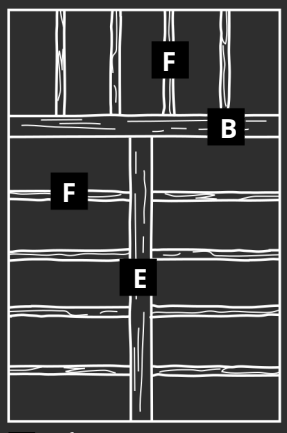

A (12ft length) x 1
C x 1
F x 11
Touch up kit

12ft x 12ft room

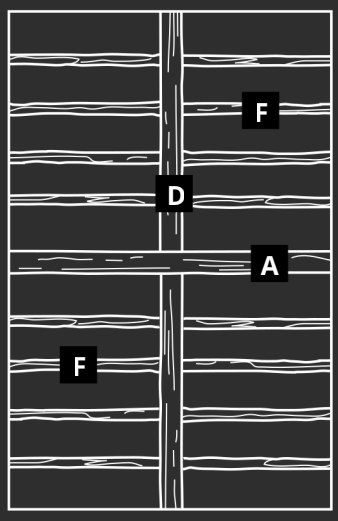

A (12ft length) x 2
F x 9 (cut in half)
Touch up kit

13ft x 8ft room

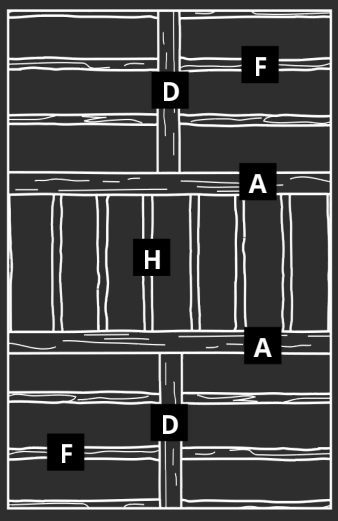

B x 1
E x 1
F x 6 (cut in half)
Touch up kit

18ft x 12ft room

A (12ft length) x 1
D x 2
F x 16
Touch up kit

18ft x 12ft room

A (12ft length) x 2
D x 1 (cut in half)
F x 12 **F** x 4 (cut in half)
Touch up kit

RSJs

If you have an exposed Steel Beam (RSJ) it will generally be covered with plasterboard and be of a size that will dictate that it becomes your main beam. (Building regulations actually now require new RSJs be clad in plasterboard to protect them from fire.)

We have 3 options to cover it:
a. The Great Beam (the size of this is better suited to larger rooms with large RSJs).
b. Beam Cladding Planks.
c. Sometimes our standard main beams can cover smaller RSJs or pipes (see the internal specification information shown with each product).

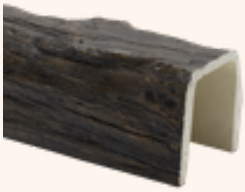

- Lightweight & easy to install
- Durable & shock resistant
- Moulded from original oak timbers
- Unlike wood, will not "move" after installation
- Hand stained for a natural look.

Low Ceilings?

If your ceilings are low, you can reduce the impact of your beams by using a smaller beam as your central beam, and running planks off it rather than joists. This will give the impression of the beams and joists being part buried in the plasterwork.

For more information on colours, please see page 22.

For more information on the accessories, please look at page 18.

Great Beam

Our deepest and widest beam.

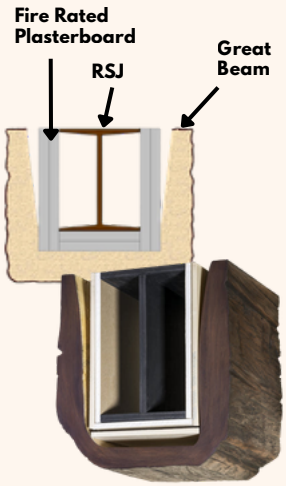

Length: 3200mm

Width: 300mm

Internal Width: 200mm (min)

Depth: 300mm

Internal Depth: 260mm (min)

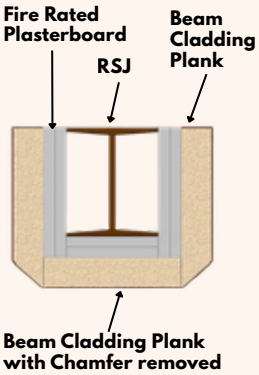

Beam Cladding Plank

Supplied as a flat plank with a chamfer on one edge.

Length: 2925mm

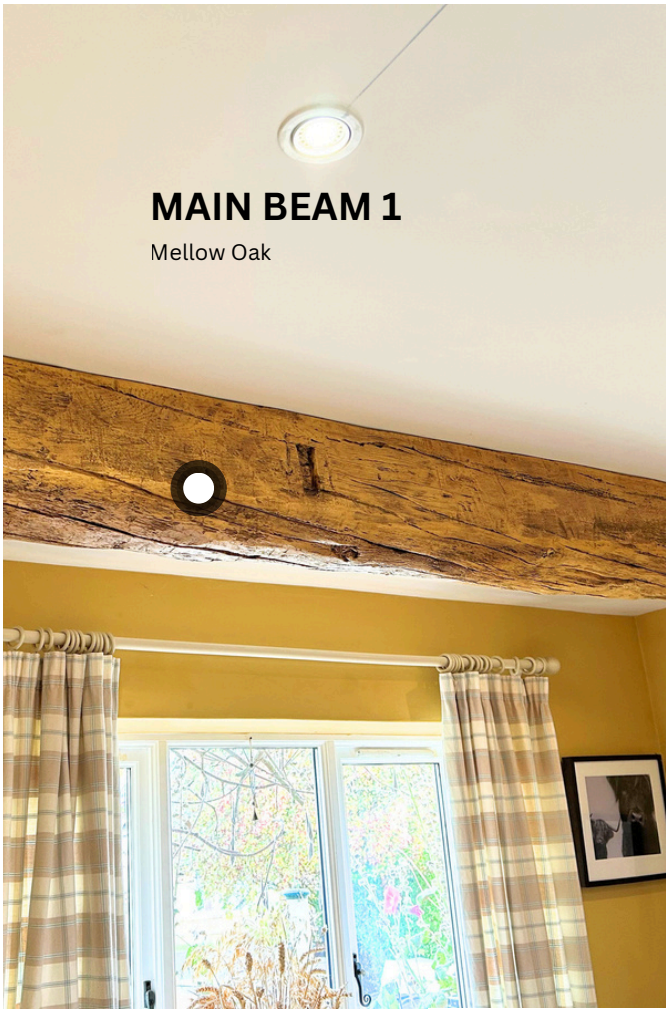

Width: 345mm

Depth: 35mm

CUSTOMER PROJECTS

CUSTOMER PROJECTS

Planks

Each plank is crafted to bring authentic timber character to your space, combining natural texture with modern practicality. Designed to be lightweight, durable, and simple to fit, these planks create a striking feature wall or ceiling with minimal effort and maximum style. Exterior Planks are made from an alternative material to allow for use as Mock Tudor Planks.

- Lightweight & easy to install
- Durable & shock resistant
- Moulded from original oak timbers
- Unlike wood, will not "move" after installation
- Hand stained for a natural look.

4" Plank (3000 x 100 x 15)

6" Plank (3000 x 150 x 15)

8" Plank (3000 x 200 x 20)

Visual Impact Tip

Consider mixing plank widths to create depth and visual interest on your project. Laying planks horizontally can make a room feel wider, while vertical placement draws the eye upward for added height. For exterior Mock Tudor Planks, arrange your planks to highlight windows, doors and gable ends.

For more information on colours, please see page 22.

For more information on the accessories, please look at page 18.

ACCESSORIES

Complete your beam or plank installation with our range of carefully designed accessories. From simulated iron brackets and straps to hide joins, to touch-up kits and decorative oak pegs, every detail helps create a polished, professional finish.

Simulated Iron Brackets and Straps

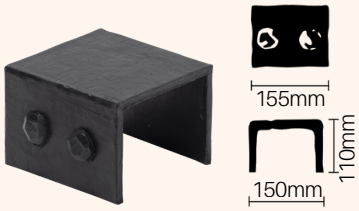

Iron brackets have been used for centuries to strengthen and secure oak timbers in traditional timber-framed buildings. Originally functional, they also added subtle decorative detail, giving historic homes their iconic character. Today, our brackets replicate this authentic look, combining heritage style with modern ease of installation.

B2 Simulated Iron Bracket

Designed to cover joins or add detail to the Main Beam 2

B3 Simulated Iron Bracket

Designed to cover joins or add detail to the Main Beam 3

Simulated Riveted Iron Strap

1000 x 35 x 5mm

Able to add detail or hide joins on any of our beams, joists or RSJ covers.

Mock Oak Pegs

Supplied as a sheet of 64 pegs. Designed to cover nail heads.

Touch Up Kit

Supplied as a pot of base coat and a pot of stain.

COLOURS

All of the products in this brochure are hand finished to best replicate the antiqued look of old wood. Most of the photography in this brochure shows our most popular finishes, but there are other options available. We can also supply these products in unfinished, which allows you to paint or stain them yourself to match your decor as you wish.

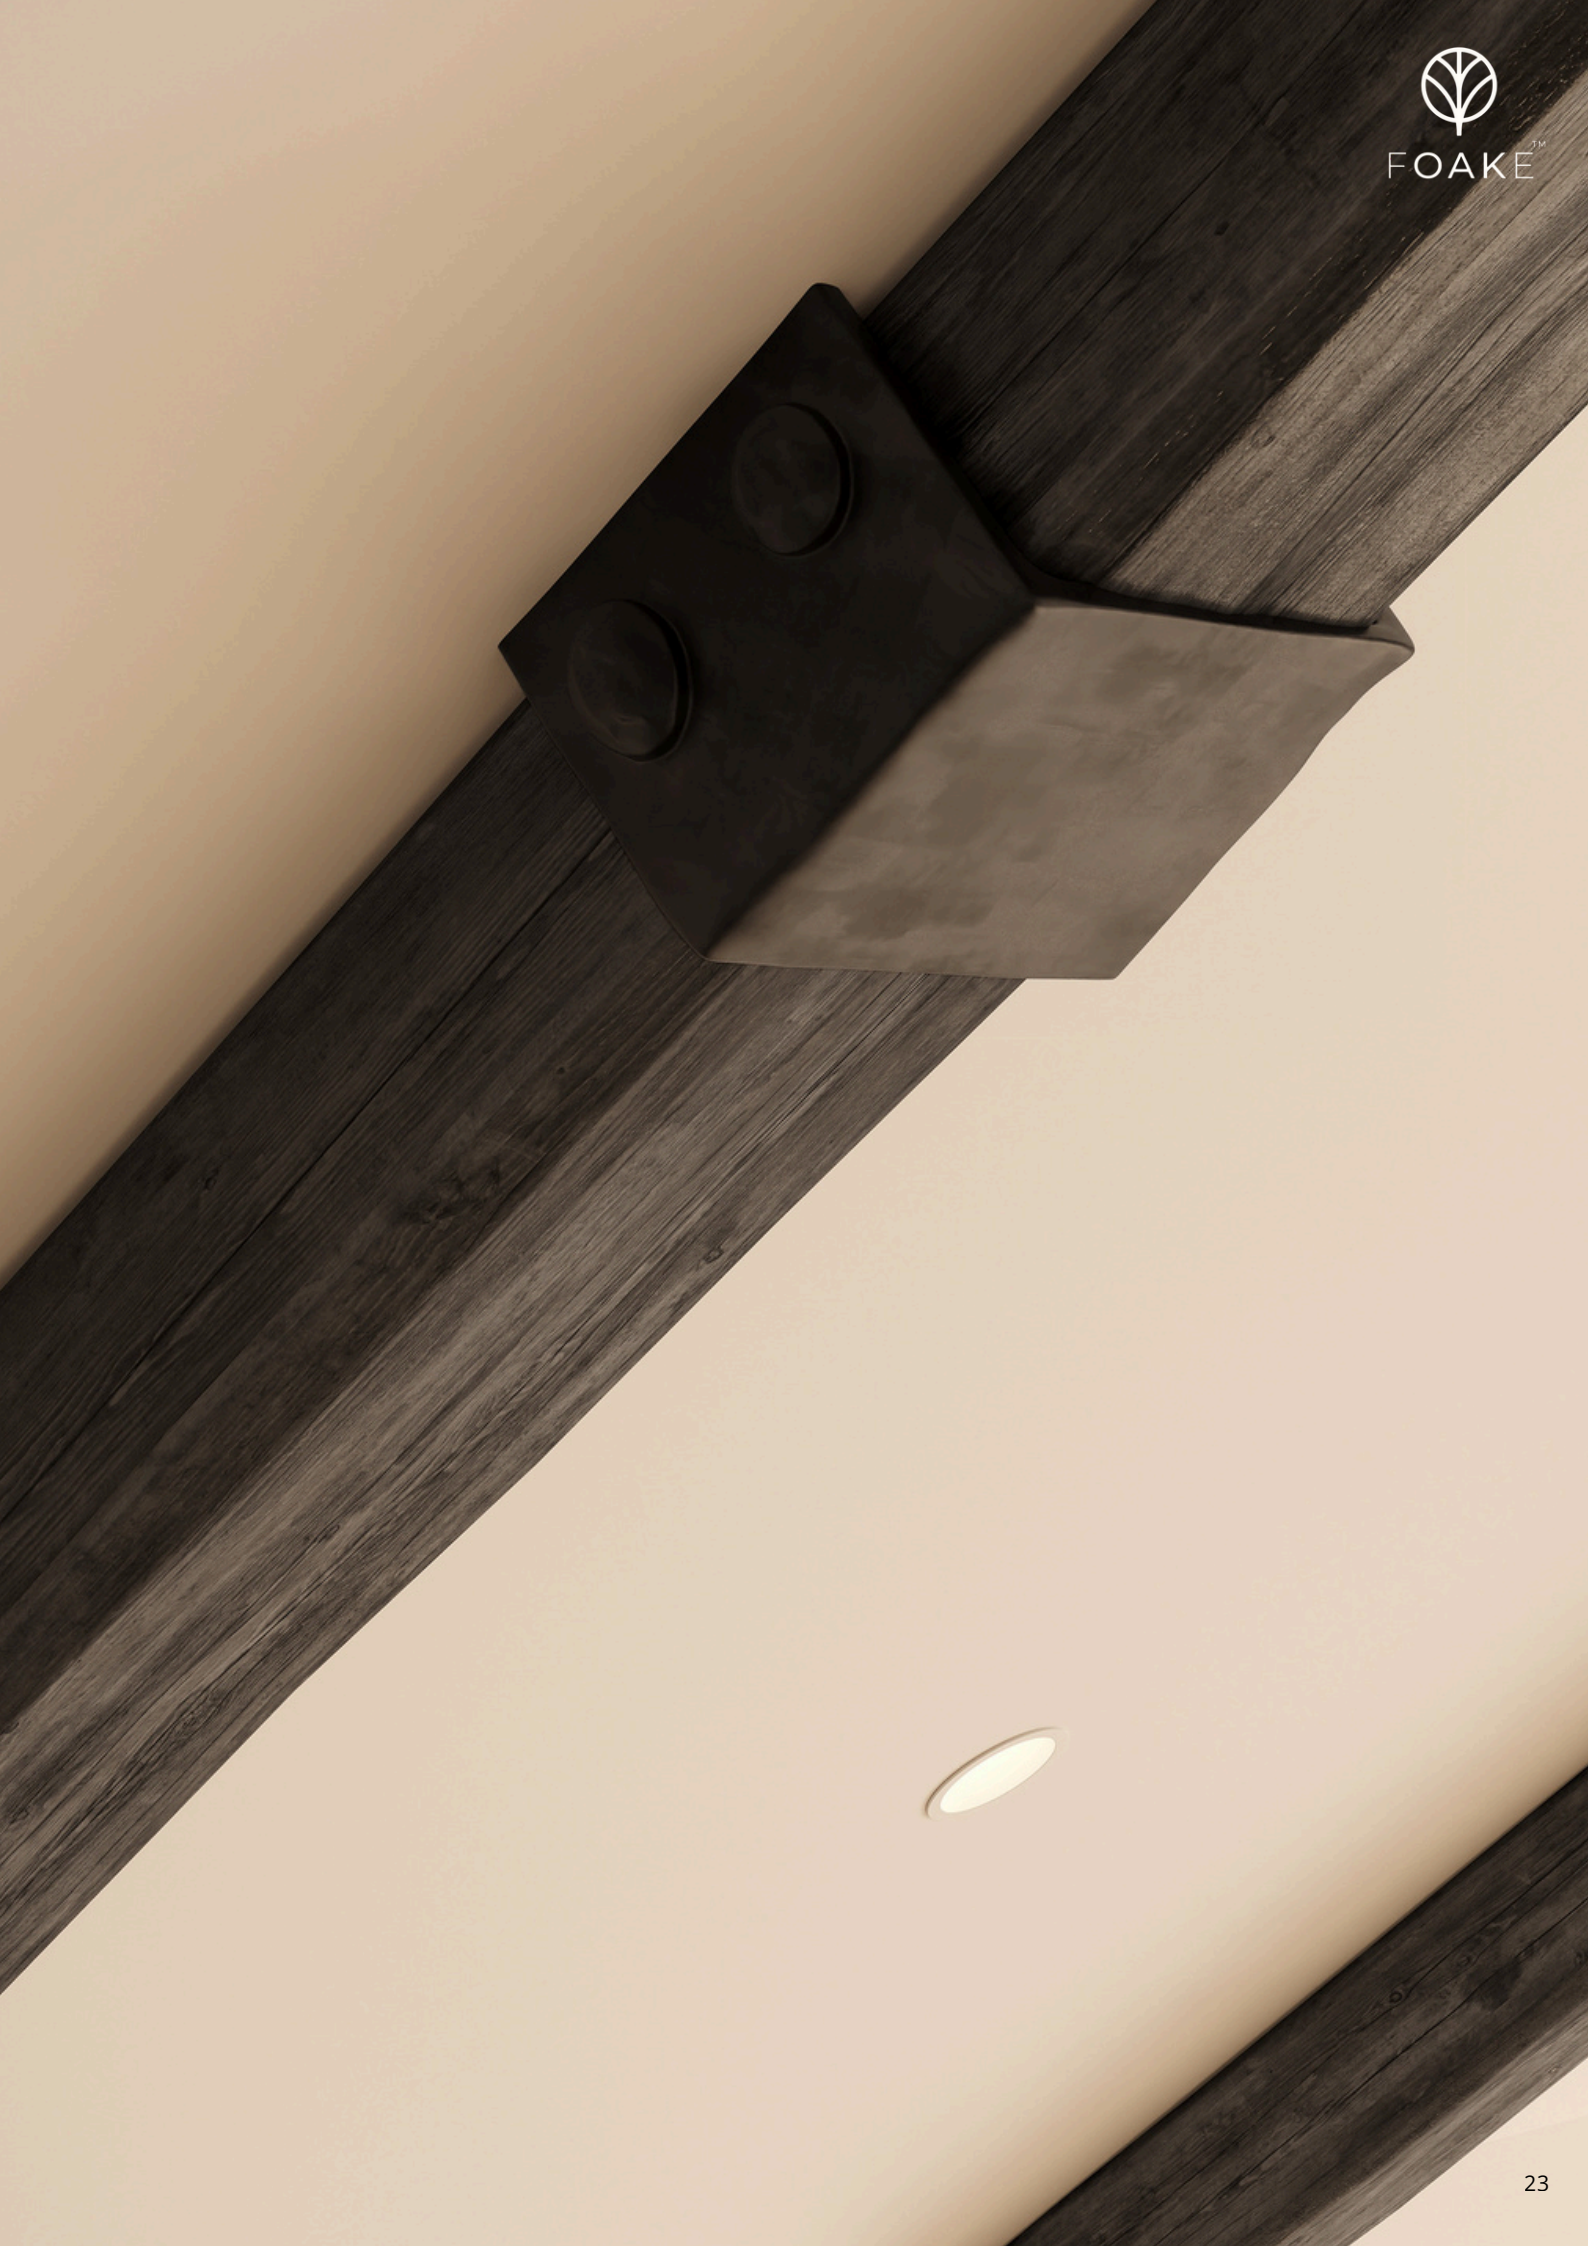

The swatch below is a guide only. Taken under studio lights, colours appear lighter than they will in your home. We do always recommend seeing a colour sample before purchasing to avoid any disappointment.

Unfinished White | **Limed Oak** | **Mellow Oak** | **Jacobean Oak** | **Black**

For samples, please visit www.ukhomeinteriors.co.uk. Please note sizes and colours may vary slightly from those shown.
